

MARY KAY

ORDER OF APPLICATION

Hello beautiful! Welcome to skin care made simple. When it comes to applying products effectively, a great rule is to organize your regimen based on the weight of the formula. The lightest products such as toners and serums are applied first, and heavier formulas such as moisturizers and creams follow. Use this product application chart to guide you with the correct order of application of your skin care products. This ensures your skin is receiving the maximum benefit of each product.
